

EGGONUM : INSTRUCTIONS FOR USE

INSTALLATION AND MAINTENANCE OF THE EQUIPMENT

To reap the full benefits of Vicard products, we recommend to follow these practical advice on storage and commissioning. The respect of the following instructions must be considered as the necessary precondition for any engagement of our responsibility. For any further information, our team remains at your disposal.

1

STORAGE : PRESERVE THE QUALITY OF YOUR PRODUCT

MATERIAL STORAGE

All our products are filled with water and checked before shipment. If you have to store this container before use, it is necessary to respect certain rules:

- ▶ **DO NOT REMOVE THE PACKAGING BEFORE ITS FINAL INSTALLATION.**
- ▶ **STORE IN A PLACE WITH ADEQUATE TEMPERATURE AND HUMIDITY (AROUND 16 ° C AND H = 70%).**

In the final implementation, make sure that your soil or support is perfectly flat and adapted to the product weight.

2

RECOMMENDATIONS FOR FIRST-TIME USE

BEFORE USING, SOME ADVICE

Shipping and prolonged storage can result in dehydration. Wood is a living material and under certain conditions (heat, dry air and drafts) its humidity level may vary.

- ▶ **FILLING YOUR VICARD PRODUCTS WITH WATER BEFORE USE WILL ENSURE THEIR QUALITY.**
Please use a non-chlorinated water without adding other disinfectants.

PROTOCOL

- 1 Fill the product.
- 2 Check for tightness. If it oozes a little, wait until it comes to a complete stop.

! WHEN USING A DRAIN PUMP, MAKE SURE TO OPEN THE PVC CAP AT THE TOP OF THE EGGONUM.

- ▶ **IF ANY LEAKS APPEAR AND CONTINUE AFTER THESE OPERATIONS, PLEASE CONTACT US:**
contact@groupe-vicard.com

WE THANK YOU FOR YOUR TRUST
